Dear Sir:

IN THE SPECIFICATION:

Please delete the title and substitute therefor a new title as follows: -- IMPLANTABLE SENSOR FOR DETERMINING POSITION COORDINATES -

Please delete the abstract and substitute therefor a new abstract which is on a separate sheet and attached hereto.

Please cancel Claims 1-24 without prejudice and substitute new Claims 25-38 as follows:

a position sensor adapted for implantation at a point within a patient's body, the position sensor being a wireless transponder for transmitting or receiving an ultrasound wave for determination of position coordinates of the position sensor at the point.

33. The device according to Claim 32, further comprising a connection mechanism for fixing the position sensor to the point within the patient's body.

34. The device according to Claim 33, wherein the position sensor is placeable at an outer surface of an organ.

35. The device according to Claim 33, wherein the position sensor is placeable at an inner surface of an organ.

36. The device according to Claim 35, wherein the organ is the heart.

37. The device according to Claim 36, wherein the point is on a valve of the heart.

38. The device according to Claim 33, further comprising a fiducial marker associated with the position sensor for identifying the position sensor on an image.

#### REMARKS

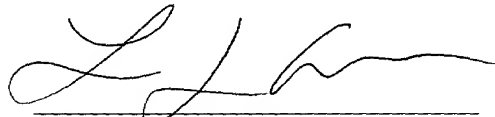

New Claims 25-38 are in the case and are presented for consideration. Original Claims 1-24 have been canceled without prejudice. The present application is a continuation application

under 37 CFR § 1.53(b) of U.S. patent application Serial No.  
09/381,753 filed April 13, 2000 (Applicants' Docket No. BIO-66).

The support for new Claims 25-38 is found in the  
specification, for example, page 3, lines 13-23; page 12, lines
